

MSD Luncheon Symposium

Ballroom, Queen Sirikit National Convention Center, Bangkok
Sunday, November 29, 2009
12:00-13.30 hr.

Improving Glucose Homeostasis in Patients with Type 2 Diabetes Through Incretin Enhancement and Sitagliptin: What does the latest evidence show us?

Chairperson: Prof. Chaicharn Deerochanawong (Thailand)

➤ State of the Art diabetes treatment: Improving glucose homeostasis in Type 2 Diabetes

Speaker: Prof. Philip Home (UK)

➤ Latest data on sitagliptin in the management of Type 2 diabetes

Speaker: Dr. Harvey L. Katzeff (USA)

Themes to be covered:

- The importance of achieving Glycemic goals (what have we learnt from the outcomes studies?)
- Evidence-based guidelines
- The challenges of achieving glycemic goals - Is step therapy an effective strategy?
- Possible limitations of established therapies
- The importance of considering all core defects when making therapy choices
- The role of incretin based therapy
